

Tue 12/8/14

[* Call NR re. glenhoguenbats. Consideration being given to excluding harvesting from the area around dump F due to the combination of TSL values including rocky outcrops, wetlands and EEC (peatlands, snow gum).

* Call AA - RT to meet [redacted] tomorrow morning. will discuss exclusion of dump F + completion of remainder, then call AA to let contractor and Wynans know.

13/8/14

- * Call AA - Agreed that dump F excluded for combination of EEC, wetlands, capped + additional rocky outcrops and high density of wombat burrows. Dumps L + M to be harvested, BP to clearly mark burrows to avoid disturbance.
- DT to arrange media response. CF
- AA to discuss with [redacted] and [redacted]
- Following that, DT to discuss + AA notification to Wynans.

- * Call AA → ① [redacted] in office in room to load GPS points.
- ② [redacted] not happy + how he is portrayed
- ③ Make Wynan happy with exclusion but wants to know how will manage wombats into the future. AA that adequately covered for in IFOA, special conditions for these Gps because direct neighbours + area of concern. FENSW do not intend to include additional prescriptions for other areas.
- [redacted] may mark burrows in other Glenlog areas.
- ↳ DT to discuss FENSW approach including how EPA should respond with DK

15/8/14

* Call [REDACTED]. Admitted that he and crew have done nothing wrong. One dangerous tree with a heron in the base was felled for safety reasons, but rotten in the base and heron felled in. It was dug out by neighbours and not filled back in by crew. Crew also found unwanted burrows + protected. Or to arrange LIZ F to call for advice on media.
